

CANADY'S

TERMITE & PEST CONTROL

1026 ATKINSON STREET LAURINBURG - 277-0837 ROCKINGHAM - 895-8393

IMPORTANT INFORMATION

- If the areas to be treated are not prepared according to this notice, a preparation fee and/or a reschedule fee (\$250 minimum) may be assessed.
- In some cases, it is necessary for us to pull back carpet to expose bed bugs. We recommend hiring a professional carpet installer to reattach the carpet. Reattachment is not included as part of our service.
- Some structures may require extra time (24-48) hours for successful treatment. Unreliable power sources and concrete structures are common reasons for longer treatment times. Your Canady's representative will work to keep you informed of any changes.
- **It will be necessary to have access to electrical power.**
- **Please provide three car length's parking space to accommodate the heat unit.**
- **After heat treatment**, the treated area may still be warm. Items will have been moved around to evenly distribute the heat. You may cool the area down as needed (open windows, turn on air conditioning, use fans, etc.) and move everything back into place.

Canady's assumes no liability for damage to structures not built to local codes, or for faulty gas meters, pipes, or wires. We are not liable for damage to old, oxidized, or improperly applied, peeled, or chipped finishes. We also assume no liability for damage to painted surfaces.

HIGH TEMPERATURE WARNING: Heat treatments involve high temperatures. The above precautions are suggestions and do not include everything that may be affected by heat. It is the tenant's responsibility to identify and safeguard any items that may be affected by the treatment. Canady's assumes no liability for damage to structures or items that are not heat safe.

TURBULENT AIRFLOW WARNING: Heat treatments involve turbulent air flow that may disturb loose paper, lampshades, and other lightweight items. Please gather loose papers and articles and place them in boxes.

I/we the undersigned have read, reviewed, and agreed to all the provisions contained herein and have acknowledged receipt of an exact copy of this safety notice. In the event that I/we do not comply with the requirements of this notice, I/we agree to hold the licensed Company/Operator, and any others involved in the completion of stated treatment, harmless of any liabilities connected with this treatment.

HEAT TREATMENT CLIENT PREPARATION CHECKLIST

IMPORTANT: This notice must be signed before our heat treatment crew arrives.

Canady's Termite & Pest Control service specialists are trained to treat your bed bug infestations with minimum damage to your home and furnishings. However, we require that the less heat-tolerant items listed below are removed.

If you have questions, please talk with your Canady's representative prior to treatment.

Client	
	People, plants and animals
	Candles, wax, crayons, lipstick and other meltable cosmetics
	Medicines and vitamins
	Aerosol cans (hairspray, insect repellent, asthma inhalers, cleaning products, etc.), fire extinguishers, and other combustible items (lighters, propane, etc.)
	Firearms and ammunition
	Oil paintings and acrylic paintings
	Fresh fruit and vegetables, chocolates, carbonated beverages, wines, liquors
	Antique furniture with finish or fragile glue points
	Musical instruments and collectibles may be heat sensitive, such as guitars
	Other:

Wrap articles that are impractical to remove in an insulating material. Small items, such as medicines, food, and cosmetics, may be placed in a refrigerator.

Please make the following preparations BEFORE our heat treatment crew arrives. Please initial each item under "Client" as preparation is completed.

Client	
	Please leave everything except for the items listed above in the home. This includes clothing, bedding, furniture, TVs, and computers. It's important to leave everything in place as bed bugs and their eggs may be found on nearly any item, and we want to ensure none survive or are brought back in the home.
	Remove all items (pictures, wreaths, decor, knickknack shelves) from the walls.
	Remove lampshades from lamps and stack on floor (to prevent them from blowing over)
	Turn over rubber-backed rugs and remove foam rubber mats from floor
	Drawers and linen closets should be loosely filled (not packed tight)
	Remove all items off of floors in closets
	Leave clothes hanging in closets. If possible, space clothes apart to help with heat distribution. Hangers may get hot so protect heat-sensitive fabrics
	Drain water beds. Deflate air beds.
	Remove vinyl window blinds.
	It's the owner or agent's responsibility to notify our company of the presence of fire sprinklers and heat sensors. Please remove batteries from smoke detectors.
	Have a spare set of clothing for day of treatment in a sealed plastic bag.
